

Verification Test Engineer (M/F)

We are looking for a verification test engineer to extend our high-tech product development department in Oldenzaal. You are acquainted with testing and qualification of (new) medical products according to design requirements. Knowledge about development of medical devices is a big advantage. You have a technical background and you are looking for challenging work in a team of enthusiastic colleagues.

As a verification test engineer, you:

- are part of a multidisciplinary team of development engineers
- will both write and execute verification tests for hardware and software
- are an experienced user of electronic measurement equipment
- will be able to create and/or adapt test tooling
- have a professional and critical attitude
- are accurate and assertive

Key elements for this function are:

- Bachelor degree in a relevant technical direction
- Excellent communication skills in English, oral and written
- Communication skills in Dutch
- Always wanting to know the mechanisms behind a solution
- A few years' experience in a similar position (pre)
- Team player

What we offer

We offer a position in a technically challenging and very stimulating environment with a relatively small team of people. Communication routes are short and we encourage our people to think outside the box. Please send your resume electronically to info@tmsi.com

For more information please contact Mr. Peter Orth, Director of Engineering.
Phone: +31 541 534 603 or e-mail: peter.orth@tmsi.com.
